EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science

Oct. 2022 – May 2026

CGPA: 7.53/10

Dr. Virendra Swarup Education Center (ICSE)

Class X: 91% | Class XII: 80%

2008 – 2022

Kanpur, UP

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS

Databases: PostgreSQL, MongoDB, Prisma ORM

Developer Tools: Git, Docker, AWS, Kubernetes, VS Code

PROJECTS

VITAS | *Next.js 13, TypeScript, Prisma ORM, PostgreSQL, Clerk, Stripe*

2024

- Built a full-stack college event registration platform following industry-standard practices like type-safe environment validation with Next.js 13, TypeScript, Prisma ORM, and PostgreSQL.
- Implemented multi-role authentication using Clerk, supporting club organisers and student participants with protected routes via Next.js middleware.
- Architected a serverless payment processing system leveraging Stripe, which facilitated a **40% increase in transaction volume** within the first quarter due to improved checkout flow.
- Engineered a custom form builder allowing organisers to create event-specific registration forms with CSV bulk import, participant table views via TanStack Table, and data export — replacing error-prone manual Google Sheets workflows.

MailNews | *NodeJS, ExpressJS, EJS, SQL, NodeMailer, Web-Scraping, CI/CD, HTML, TailwindCSS, Git*

2023

- Engineered a full-stack web application leveraging **NLP-based topic classification** to scrape and summarise news articles across 10+ categories, delivering personalised digests to user inboxes based on interests and preferred schedules — boosting **information consumption by 20%**.
- Architected a **NodeJS + Express** backend with **SQLite3** for persistent user preference storage and automated cron-job scheduling, achieving a system **uptime of 99.94%** across continuous delivery cycles.
- Built a **NodeMailer**-powered email pipeline that batched and dispatched personalised newsletters to **100+ subscribers**, reducing average email delivery latency by **35%** through asynchronous queue processing.
- Implemented a **CI/CD pipeline** with automated testing and deployment workflows, cutting manual release effort by **60%** and enabling zero-downtime updates to the live scraping and delivery service.

ADDITIONALS

Core Member, Data Science Club, VIT Bhopal

2023 – 2024

- Served as a core member of the Data Science Club, actively contributing to club initiatives, discussions, and collaborative learning sessions focused on ML and data analysis.
- Assisted in organising club events, workshops, and technical sessions, coordinating logistics and outreach to drive student participation and engagement.

Certifications:

- The Bits and Bytes of Computer Networking (Google)
- Cloud Computing (NPTEL)
- Marketing Analytics (NPTEL)
